

Environmental and Waste Technologies 4.0

Everything from a single source for maximum reliability of results

- ***Owner-managed and independent***
- ***Company headquarters in the Munich area***
- ***22 specialists in planning and plant construction***
- ***Approx. 150 completed projects in plant engineering***
- ***Entirely manufactured in the EU***
- ***Purchase of proven units***
- ***Use of state-of-the-art technology***
- ***Target market Europe***

Partner for recycling solutions and plant engineering

Over 35 years of experience in

- *the development of concepts for the circular economy*
- *turnkey installation and commissioning*
- *maintenance, service and staff training*
- *CE-certification*
- *accident prevention regulation inspections and electrical inspections of sorting systems*
- *the planning and construction of special solutions*

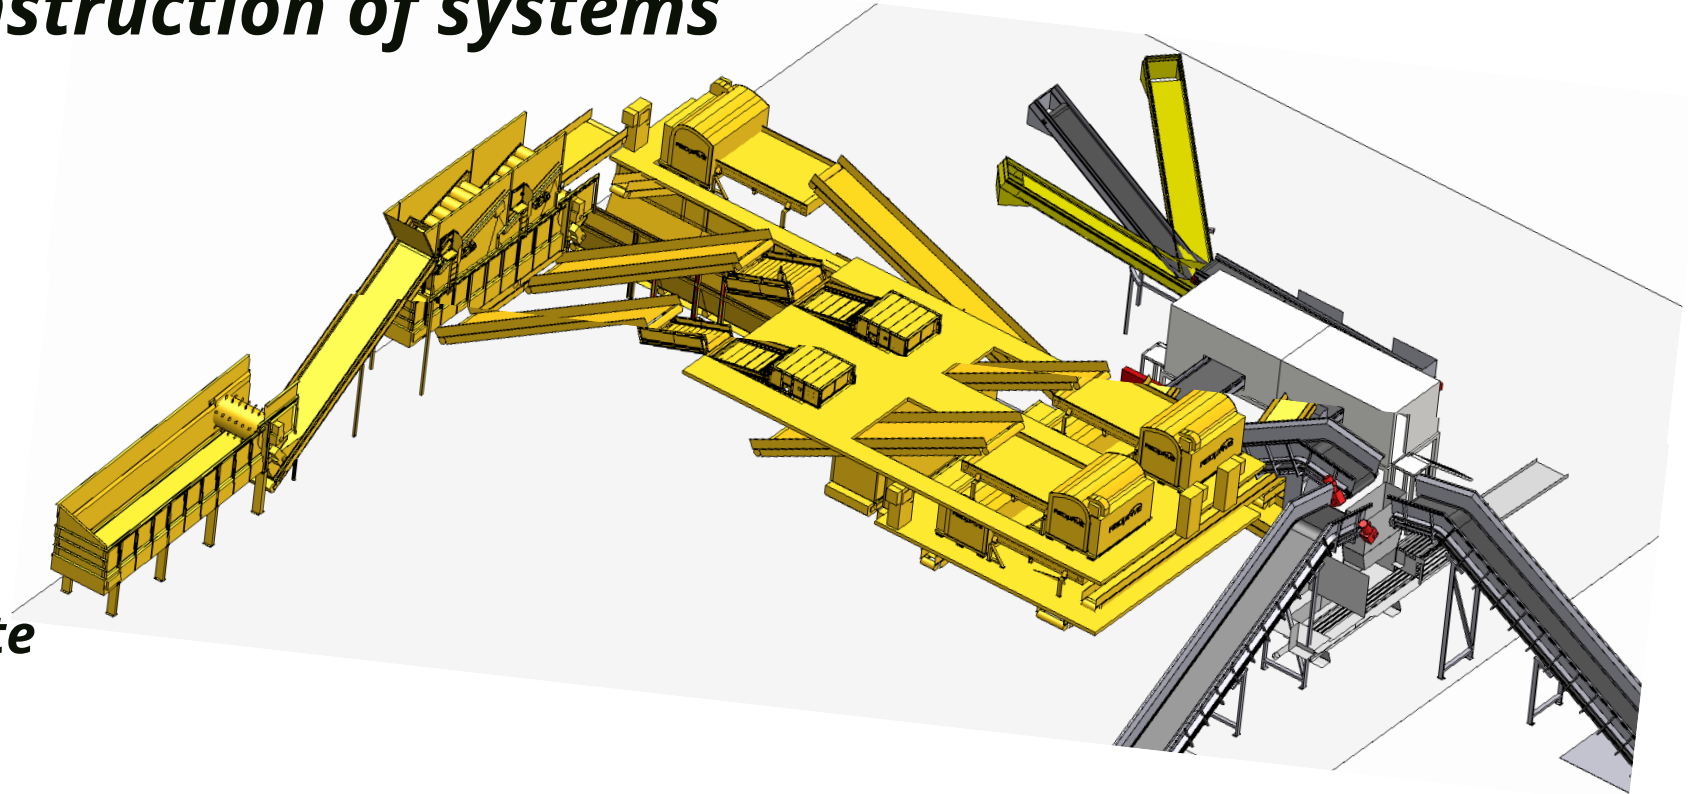

Tailor-made recycling solutions

Design and construction of systems for

- ***Waste paper***
- ***Plastics***
- ***Lightweight-
Packaging***
- ***Construction waste***
- ***Bulky waste***
- ***Waste wood***
- ***Household and commercial waste***

Partner for state-of-the-art sorting technologies

AI-supported solutions for

- ***automated sorting***
- ***a separation by shape and colour***
- ***the separation of impurities***
- ***the sorting of 6 different fractions***
- ***up to 70 picks per minute***
- ***use as quality control at the end of the sorting line***

Intelligent plant control MAX - POS

Plant control and process optimisation for

- *fully automated plant operation*
- *optimisation of output quality*
- *the increase in throughput*
- *the modification of machine parameters*
- *quality control evaluations*

Lean Management

Focus on the customer

- *Short distances for quick decisions*
- *Dedicated contact persons for each project*
- *Focusing on what we can do*
- *Targeted implementation*
- *Flexible to meet our customers' requirements*

*Have we sparked your interest?
Then please feel free to contact us!*

Thank you very much for your attention
