

K-TE
BEYOND TURNKEY

Company presentation

Who are we?
What do we do?

An innovative company in plant engineering

K-TE management traditionally comes from the plant construction of wood pellet plants and has established itself in recent years, among other things, in recycling and adjacent technologies.

Here are a few technologies
that we would like to introduce

Torrefizierung

Turn Biomass
into Energy and/or
Biochar

Gasification

Transforming plastics
in Gas
or Energy

Biogas

Optimization of
substrates or
processing of
digestates

Pelleting

Pelleting of biomass,
plastics and minerals

Let's work together
