providing key insights on sustainable procurement standards to meet requirements for successful trade and growth within the European Union

Holistic view and practice-oriented approach

Practical knowledge and skills by case studies, exercises and check lists

Gain proficiency in utilizing specific implementation tools to solve challenge

Optional: **“Certificate of expertise”** for Tailored Transfer to Your Company’s Needs!

Why You Shouldn’t Miss Out!

Sustainability in the European Union has long been an integral part of economic and social debates. Consumers and other stakeholders are increasingly advocating for a more robust **commitment to the circular economy, sustainable raw materials, and recycling concepts.**

Sustainability is evolving into a **strategic competitive advantage** for companies and a **prerequisite for long-term business growth** in international trade relations.

Procurement is assuming a crucial role in global sustainable development to fulfill EU requirements for sustainable business in global supply chains.

Who Should Attend?

This course is crucial for companies which want to grow their international business within the European Union by meeting sustainability regulations (e.g. European Green Deal, Corporate Sustainability Due Diligence Directive -CSDDD) and related standards (e.g. ISO 20400:2017)

This course is designed for **purchasing managers, supply chain managers, procurement officers, strategic buyers, quality managers, environmental managers, and sustainability managers** across diverse industries and sectors. It is ideal for those **aiming to incorporate sustainability criteria into their procurement processes** and enhance material group and supplier management professionally.

The course caters to participants from both the private and public sectors.

AHK Online Training Fit for sustainable business in Europe

CONTENTS

1 Sustainable purchasing: regulatory framework conditions

- Definition, reasons, motivation and obstacles
- Background, development and core elements of the most important laws and legal frameworks
- What obligations arise for companies, what opportunities can be derived?

2 Pulse Check and strategy derivation in purchasing

- Analysis of the status quo of sustainable procurement management
- Supply chain analysis: social and environmental risks along the supply chain
- Risk assessment along the value chain, country and sector risks

3 Product group analysis

- Development of a sustainable shared ownership strategy: initial situation, objectives, thrusts and individual objectives
- Derivation of NH measures using a checklist for all important NH priorities
- Consideration of sustainability in tenders, suitability criteria, technical specifications and award criteria

4 Supplier analysis: sustainability risks

- Instruments/methods for the systematic realization of professional supplier management
- Supplier self-disclosure and Supplier Code of Conduct
- Controlling strategic supplier management: managing supplier strategies with NH key figures

5 Analysis: Sustainability risks in the supply chain

- Standards for compliance with corporate due diligence along the supply chain
- Supply chain analysis: social and environmental risks along the supply chain
- Methods, procedures and risk assessment for implementing sustainability standards along the value chain

6 Tool guide for the expansion of sustainable procurement

- Overview of the most important tools and requirements and obstacles to the use of digital and technological solutions
- Tools for analyzing and monitoring sustainability targets along the entire supply chain and measuring ongoing progress on key sustainability indicators

7 Transformation management in purchasing

- Phase model for establishing sustainable procurement
- Organizational anchoring of sustainability in purchasing
- Incorporating sustainable procurement into an integrated (environmental) management system
- Ongoing risk management from a CSR perspective

Optional:

Certificate Exam – for the Best Possible Practical Transfer!

In addition to the seven course modules, an individual examination opportunity is available:

Applying the knowledge gained, you will **craft a personalized transformation roadmap for your company**. This roadmap will be presented during an oral exam via video conference following the modules. Subsequently, engaging in an expert discussion, you'll have the chance to elaborate on your approach and **receive further recommendations and assistance for the future**.

After you passed the exam successfully you will receive a **«certificate of expertise»** for sustainable procurement management.

AHK Online Training Fit for sustainable business in Europe

At Your Side – Our Experienced Trainer and Transformation Expert from Sustainable Procurement Best Practices

Carsten Vollrath, CEO, IPG GROUP

„Sustainable procurement makes a decisive contribution to creating long-term value for companies by not only reducing environmental and social impacts, but also offering economic benefits and better positioning the company for future challenges. The Best Practice Training «Fit for Growth» is a must for all executives in purchasing and supply chain management.“

Your Trainer

Carsten Vollrath has over **30 years of industry and consulting experience**. His practice focuses on strategy and business model innovation as well as cost reduction, efficiency and quality improvement for purchasing, supply chain and production. The development and implementation of **innovative sustainable and digital approaches** in the area of **business transformation and operating models** as well as the **future of procurement and supply management** form the central focus of his activities and publications.

Benefits & Methodology

- 1** This course offers a **holistic view and practice-oriented approach to the fields of action and opportunities available in procurement**. It aims to **systematically integrate sustainability into procurement strategies and practices**.
- 2** The course **imparts practical knowledge and skills** essential for professionally **analyzing and further developing procurement** towards establishing a sustainable procurement organization. Through presentations, case studies, exercises, and checklists paired with selected practical examples, ample time for discussion, and addressing individual queries, **participants gain tangible guidance** applicable to their respective organizations and processes.
- 3** Case studies and practical exercises illustrate the challenges, tasks, and interconnections between the seven training modules and convey the training material in a lively and vivid way. Participants **gain proficiency in utilizing specific implementation tools to solve challenges** in sustainable everyday purchasing, ensuring high practical relevance and benefits.

Participants who opt out of the final exams will receive a "**certificate of participation**".

Additional Option - Participation in the final exam is voluntary:

The Certificate Exam: Develop Your Individual Transformation Roadmap!

- 4** To acquire the "**certificate of expertise**", participants engage in a practical project involving the formulation of a project proposal or roadmap titled "**Analysis and Further Steps for Sustainable Procurement Development/Enhancement**". By participating in the certificate exam, you'll be empowered to **transfer sustainability challenges to your individual procurement environment**, fostering initial solution approaches **tailored to your company**. The **oral examination** encompasses presenting the practical use case for sustainable procurement in your company incl. a transformation roadmap followed by a technical discussion. The **individual „use case"** integrated into the final exam process ensures **high practical relevance** within each participant's company and procurement environment. It serves as an **ideal platform** for their own sustainable procurement initiatives.
